

SPHERIC

Spherical IOL

Combined with 100% hydrophobic material and unique manufacturing process Zaracomm Lenses product range of IOLs provides surgeons the options for high quality optics, which have glistening free behavior and better visual acuity. The material and design of the lenses ensure controlled unfolding of lenses at room temperature and great centration for different sizes of capsular bags.

Key Features & Benefits

- High quality 100% hydrophobic material with market-proven IOL design.
- Cost Effective
- Single-piece modified L-loop, non-angulated haptic design for excellent centration in different sizes of capsular bags.
- 360-degree, square-edge design for decreasing PCO rate.
- Unique manufacturing process ensures glistening free behavior and better visual acuity.
- Smooth injection and controlled unfolding of lens at room temperature.
- Optimum refractive index ensures minimal glare and halos, thus providing better contrast and visual acuity.

Model Name	UF60125/UF60130/F-260
IOL Design	Single piece for posterior capsular bag
Material	Glistening Free, Hydrophobic Acrylic with UV absorber
Optic Diameter	6,0 mm
Overall Length	12,50 / 13,00 mm
Haptic Angle	0°
Optic Design	Biconvex 360° square edge optic and haptic
Diopter Range	0D to 40D, 0.5D increment from 0D to 40D
Refractive Index	1,51
Material Water Content	<1 %
Sterilization	EIO
A constant	118,4
ACD	5,2
Type of Delivery System	Easy to handle IOL holder
Incision Size	2,2 mm -2,4 mm
Shelf Life	5 Years
